

Amendments to the Claims

This listing of claims replaces all prior versions, and listings, of claims in the application.

Listing of Claims

Claim 1. (Currently amended)[[:]] A projector holder comprising a connecting element ~~(2)~~ which includes having a coupling element ~~(23)~~ for connection of the projector holder to a supporting structure, and at least three arms ~~(1)~~ which are carried by the connecting element for rotation about mutually parallel axes and for radial displacement relative to said axes, so that a first end ~~(10)~~ of the arms ~~(1)~~ can be brought into alignment with threaded openings ~~(42)~~ in a wall ~~(41)~~ of a projector housing, ~~wherein~~ each arm ~~(1)~~ carries carrying a coupling device ~~(3)~~ for connecting said first end of a respective arm to a nearby threaded opening ~~(42)~~ in the wall of said housing, and ~~wherein~~ the connecting element ~~(2)~~ is being adapted to releasably secure ~~the~~ a second end ~~portions~~ ~~(12)~~ of the connected arms, ~~characterised in that~~ the coupling device ~~(3)~~ includes including a screw ~~(31)~~ which extends through an opening ~~(11)~~ through in the first end ~~portion~~ ~~(10)~~ of a respective arm ~~(1)~~ with a given degree of clearance, and two nuts ~~(33, 34)~~ which co-act with the thread on the screw ~~(31)~~ and each of which is mounted on a respective side of said arm ~~(1)~~, ~~wherein~~ the thread on the screw ~~(31)~~ is being able to co-act with the thread in the opening ~~(42)~~ of the projector housing wall[[:]] ~~such~~ so as to enable the screw

~~(31)~~ to be screwed to a desired depth in threaded openings ~~(42)~~ in said housing wall ~~(41)~~, ~~wherein the nuts (33, 34) can be moved~~ being movable along the screw ~~(31)~~ in a manner to locate the arm ~~(1)~~ at a chosen distance from the housing wall ~~(41)~~ and ~~such~~ so as to be tightened against said arm and ~~therewith~~ secure the screw ~~(31)~~ against rotation, and the connecting element including a screw and a nut which co-acts with said screw of the connecting element, with the second ends of the respective arms including an elongate slot through which the screw of said connecting element extends, and the screw of said connecting element extending through the slots so as to enable a stack of the arms to be clamped stably to the connecting element.

Claim 2. (Canceled)

Claim 3. (Currently amended)[[:]] A The projector holder according to Claim 2 1, ~~characterised in that~~ wherein the slots ~~(13)~~ in the respective arms are open towards said second end ~~(12)~~ of the arms.

Claim 4. (Currently amended)[[:]] A The projector holder according to Claim 1, ~~characterised in that~~ wherein the arms ~~(1)~~ have generally a flat cross-sectional profile so as to support stably against each other in the connecting element ~~(2)~~.

Claim 5. (Currently amended)[[:]] A The projector holder according to Claim 1, ~~characterised in that~~ wherein the arms (1) are generally straight, so as to extend generally radially to the screw (21) of the connecting element that carries the tightening nut (24) of said element (2).

Claim 6. (Currently amended)[[:]] A The projector holder according to Claim 5, ~~characterised in that~~ wherein the further screw (21) of the connecting element (2) includes a shoulder (22) that supports against an adjacent arm (1) one of the arms.

Claim 7. (Currently amended)[[:]] A The projector holder according to Claim 2 1, ~~characterised in that~~ wherein the arms (1) have generally a flat cross-sectional profile so as to support stably against each other in the connecting element (2).

Claim 8. (Currently amended)[[:]] A The projector holder according to Claim 3, ~~characterised in that~~ wherein the arms (1) have generally a flat cross-sectional profile so as to support stably against each other in the connecting element (2).

Claim 9. (Currently amended)[[:]] A The projector holder according to Claim 2 1, ~~characterised in that~~ wherein the arms (1) are generally straight, so as to extend generally radially to the screw (21) of the connecting element that carries the tightening nut (24) of said element (2).

~~Claim~~ 10_. (Currently amended)[[:]] A The projector holder according to Claim 3, ~~characterised in that~~ wherein the arms ~~(1)~~ are generally straight, so as to extend generally radially to the screw ~~(21)~~ of the connecting element that carries the tightening nut ~~(24)~~ of said element ~~(2)~~.

~~Claim~~ 11_. (Currently amended)[[:]] A The projector holder according to Claim 4, ~~characterised in that~~ wherein the arms ~~(1)~~ are generally straight, so as to extend generally radially to the screw ~~(21)~~ of the connecting element that carries the tightening nut ~~(24)~~ of said element ~~(2)~~.
